Open the program under Accessories, then File and then Options.. My favorite is, "œI'm taking my camera for a walk."œ□

“What camera?” “The one I'm taking.” As a kid I was an artist; I can envision an enormous collection of memorabilia. I LOVE, Motordia Komfort Manager Full 20, my dogs. And when it comes to the reason why I love, my dogs I will just say this, “It is always better to feel love than to have it.”

Q: Implementing two functions with one button I'm working on an exercise where I have to insert two different functions under one button. So far I've written one function working perfectly. How can I

extend the 2nd one? This is my code so far:

```
function Intro() { //
Function 1 const result = validateCreditcard(document.querySelector('#cardNumber').value);
alert(result); // Function 2 const
result2 = validateCreditcard2(document.querySelector('#cardNumber2').value); alert(result2);
} Proceed A: You could use a single function and use the logic to decide which function to call based on the the value of the . I have added comments to give you a step-by-step on how to proceed.
```

```
function validateCreditcard(value) {
```
