It provides the standard editing tools you can find in similar apps, a spellchecker and a catalog to neatly organize files. Create numerous documents using a clear-cut interface It displays a well-structured and modern layout with a ribbon menu, where each feature has its own section. The options are self-explanatory and don't require too much time to get familiarized with. To access the contacts, you need to have installed in the computer Addresses 3 and Invoice 5 both found on the developer's website. If you're using the utility for the first time, it's recommended to first make several new documents, as the open function, only detects existing records, saved in specific groups.You can either simply start typing your ideas or import text by pasting it from the clipboard. Customize the content with images and symbols and view the output before printing A rule-grid is displayed in the upper part of the document to help you align your sentences much easier. It's possible to find and replace characters or phrases with different ones and save records in distinct categories, like private or business. What's more, you can create your own custom groups with individual icons. It offers a broad range of elements for personalizing text, such as font type, style, color and size, as well as align paragraphs and insert variables, like company, name, city or address. Images and the date can also be inserted. If you have lots of pages and you wish to auto-detect mistakes or grammar errors, you can enable the spell checker, which underlines the misspelled words, so you can view them easier. All the stored notes are displayed in the catalog tab structured in multiple categories. In the right, a table is b7e8fdf5c8
